

Michael Powell's single minded drive to loosen the limits on broadcast ownership is tragic, and disregards our constitution and the values that our founding fathers held dear.

The political maneuvering and deliberate limiting of public comment and discussion in the face of overwhelming public opposition leads inevitably to the conclusion that this is being done exclusively for the benefit and at the bidding of large media.

By his actions Mr.Powell exhibits contempt for the public good, and for the concerns of the owners of these air waves - the American citizenry. This is a travesty of justice.
